

# Covid-19 evolution, Oceania (data from JHU CSSE, 10/12/21)

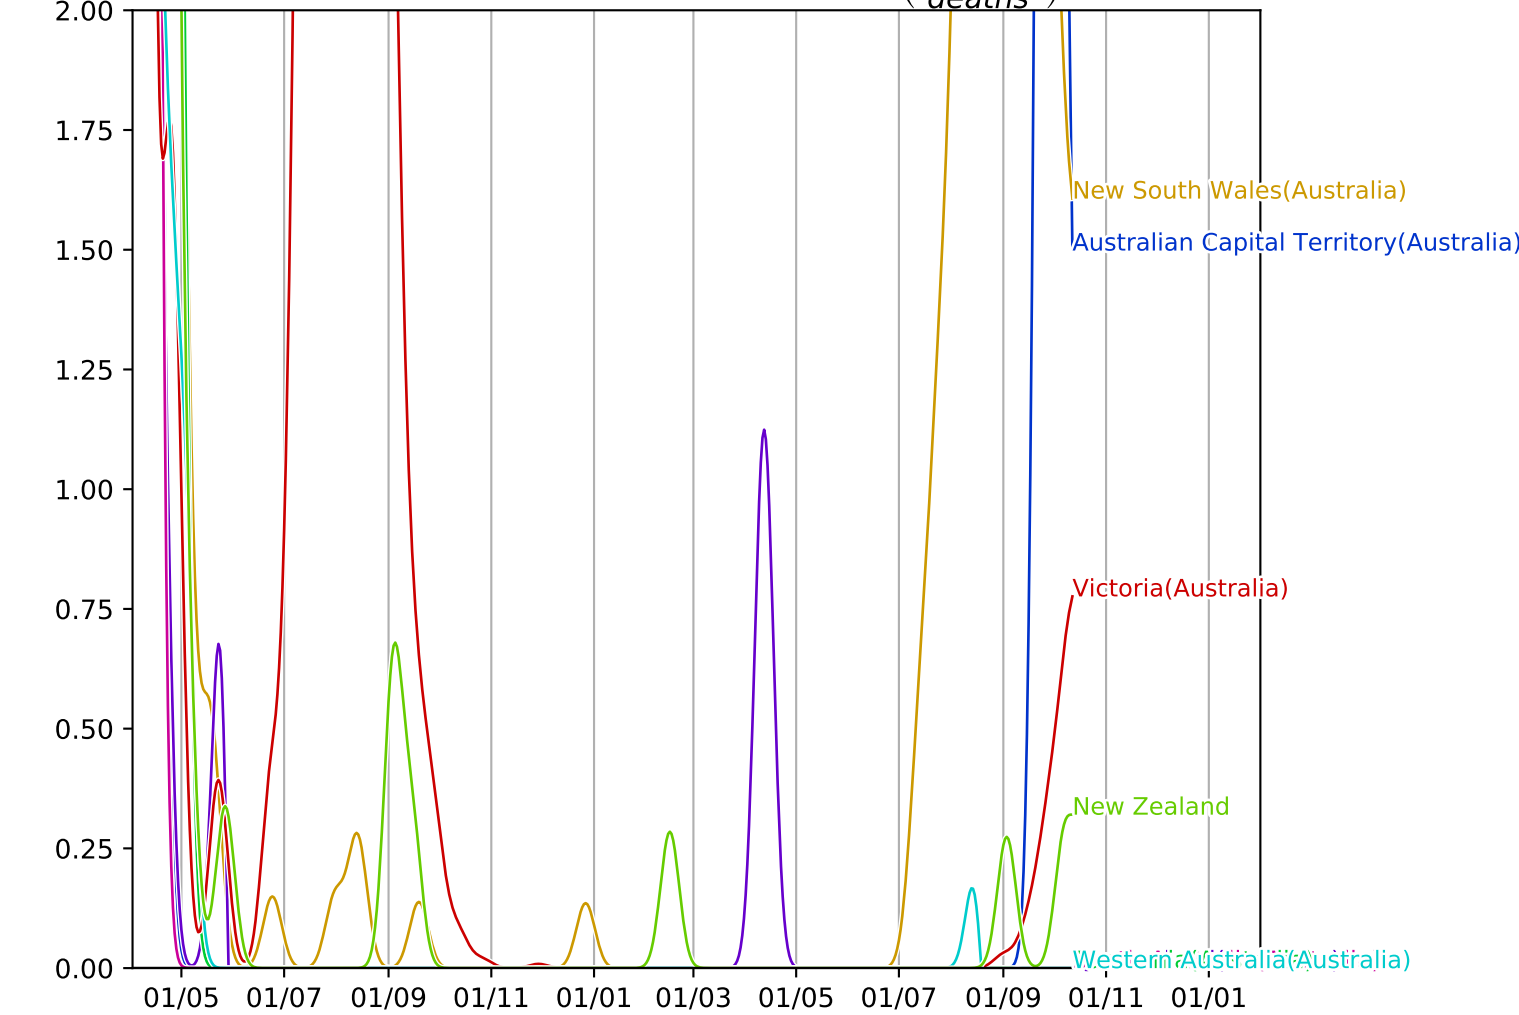

Total number of deaths for 10<sup>6</sup> people

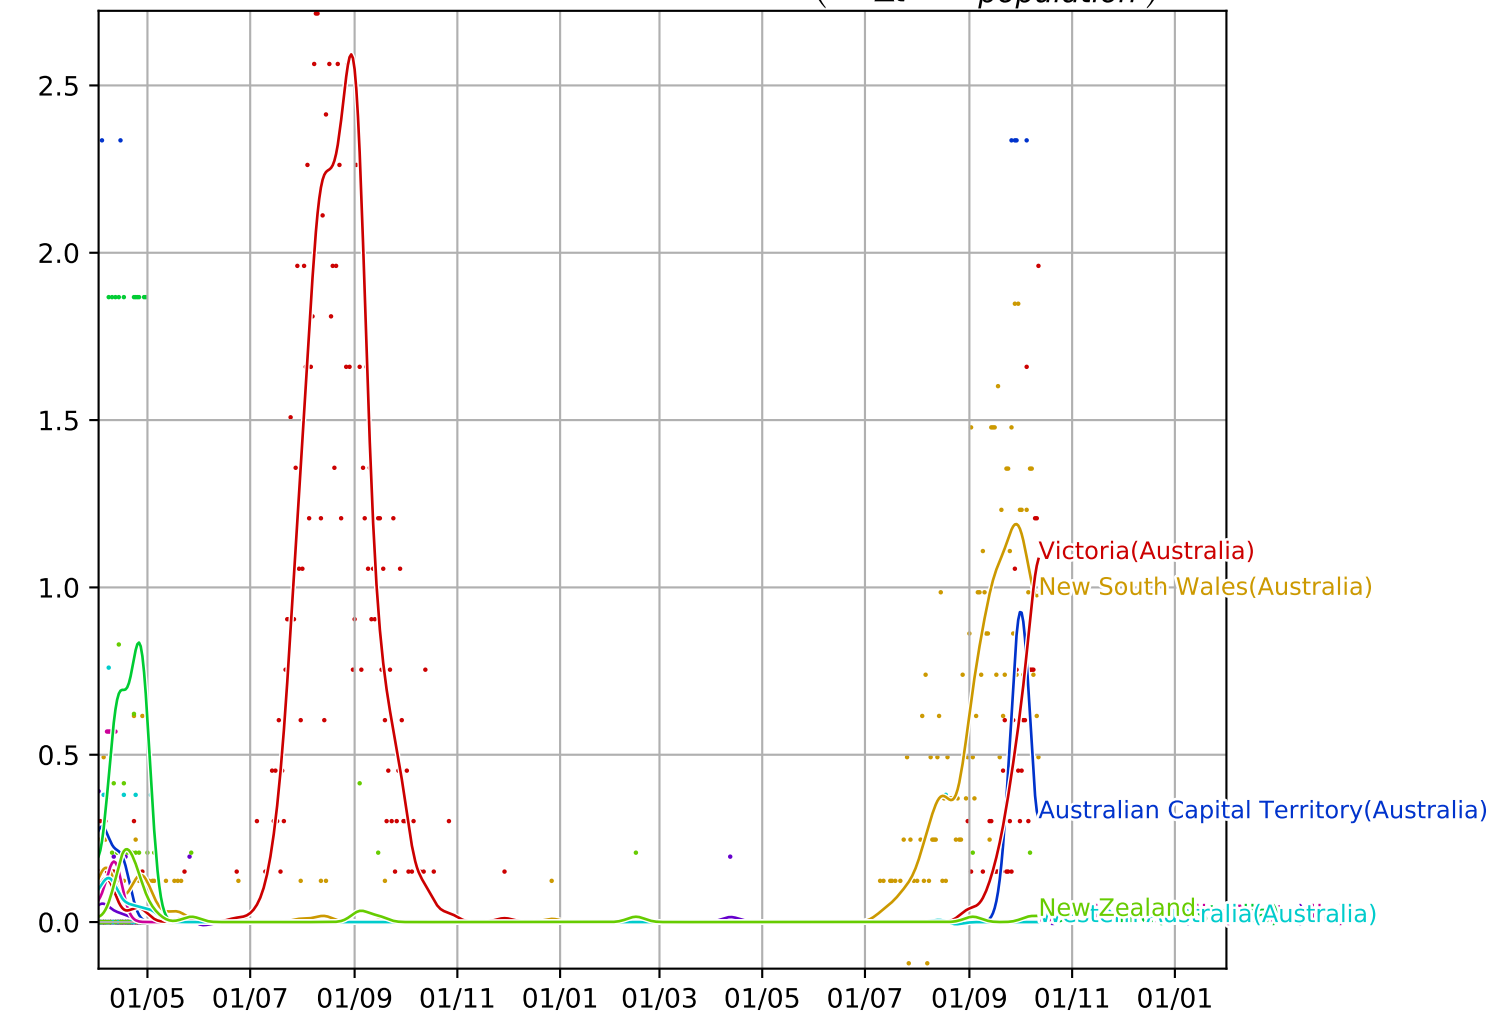

Total number of deaths for 10<sup>6</sup> people (log scale)

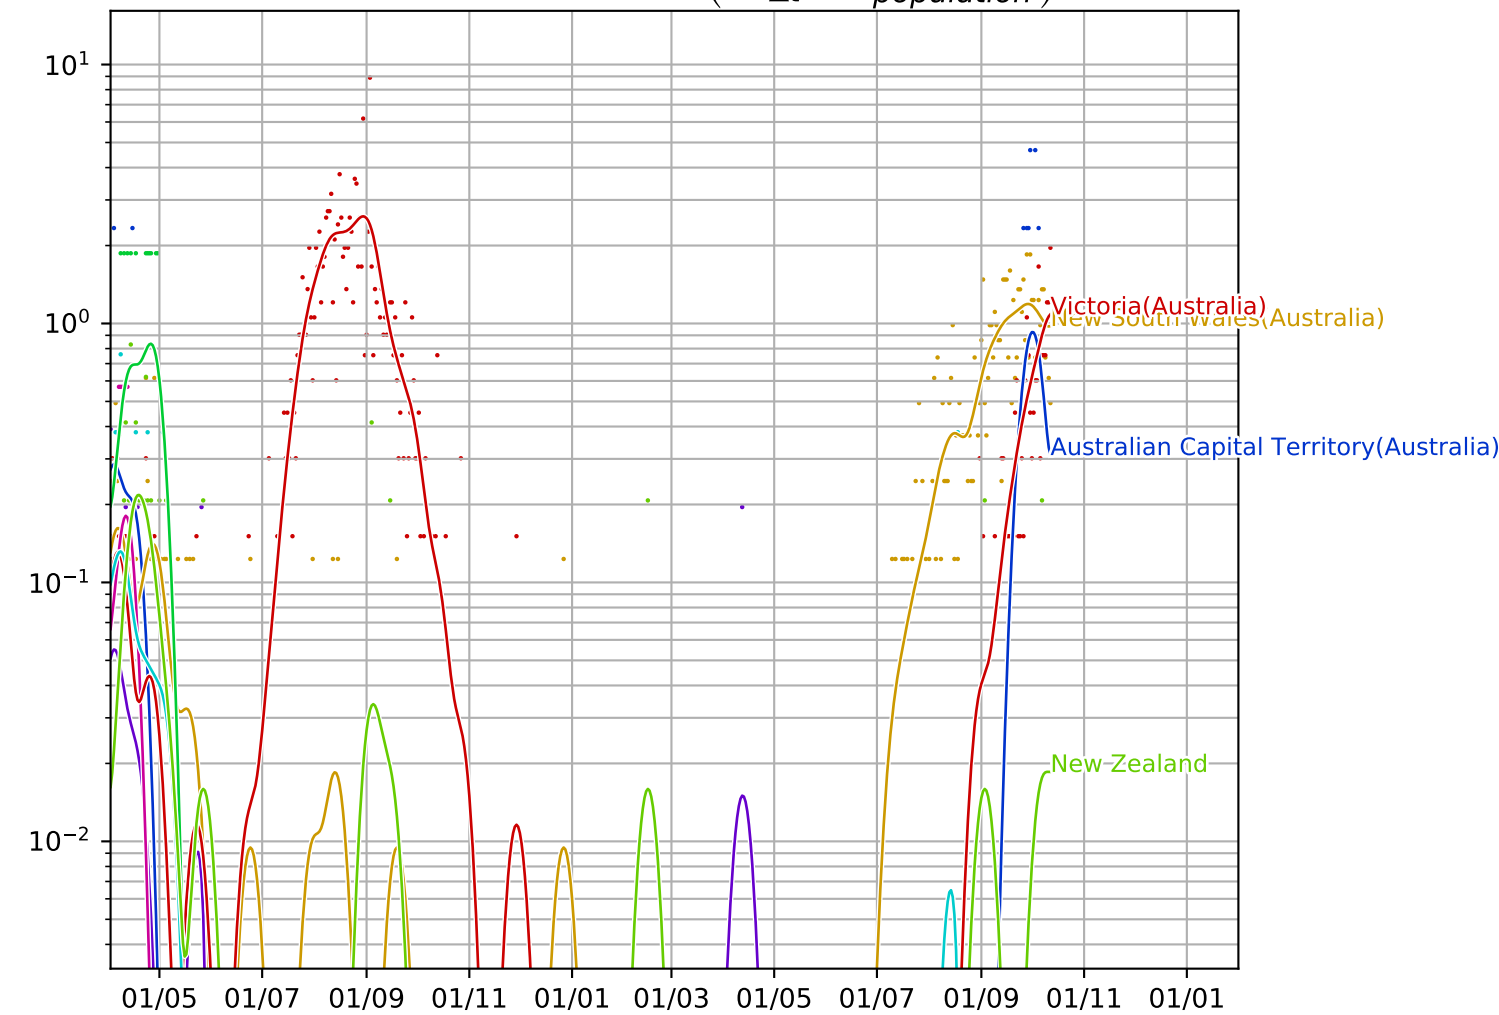

Growth rate (%) of deaths  $\left(\frac{\Delta \text{deaths}}{\text{deaths}}\right)$

deaths by day for 10<sup>6</sup> people  $\left(\frac{\Delta \text{deaths}}{\Delta t} \cdot \frac{10^6}{\text{population}}\right)$

deaths by day for 10<sup>6</sup> people  $\left(\frac{\Delta \text{deaths}}{\Delta t} \cdot \frac{10^6}{\text{population}}\right)$  (log scale)

Acceleration of deaths for 10<sup>6</sup> people  $\left(\frac{\Delta^2 \text{deaths}}{(\Delta t)^2} \cdot \frac{10^6}{\text{population}}\right)$
